

Built better to last longer

Balanced Ventilation System

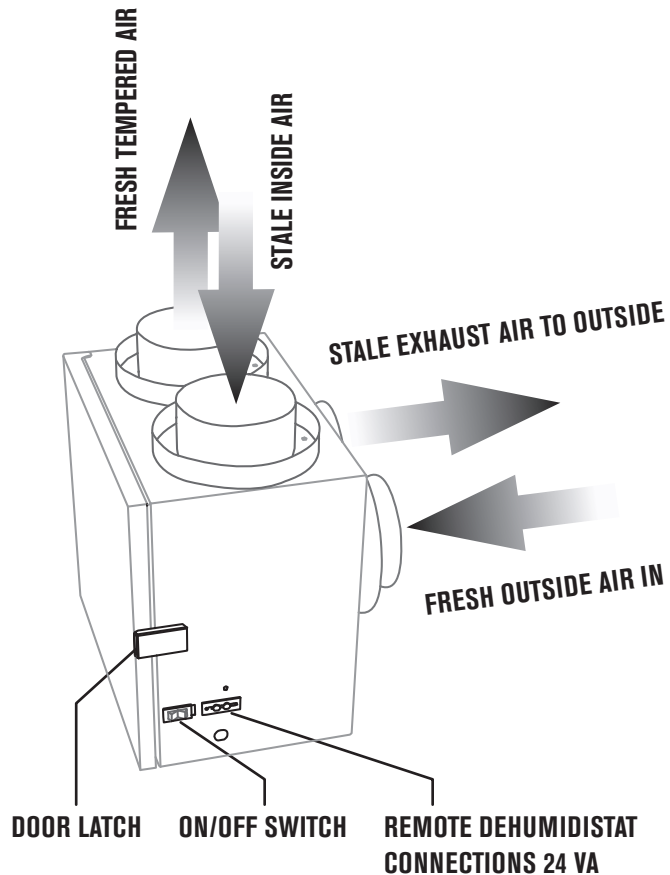

Superchanger Model SV35

The ultimate balanced ventilation system for quality conscious owners of smaller homes. Provides fresh outside tempered air while filtering indoor air.

Compact high quality balanced system provides 100 cfm (at high speed) of fresh outdoor air while exhausting an equal amount of stale indoor air. The fresh air is mixed, filtered and tempered with indoor air prior to being distributed throughout the home through the duct system.

Engineering Data:

- Cabinet Size, 15" wide x 13 1/2" tall x 10" deep. Painted galvanized 22 gauge casing fully insulated to prevent condensation while providing quiet operation.
- Integral motorized impeller.
- High efficiency, 120 vac, 60 watt, impeller assembly. Reverse inclined high performance polymeric wheel.
- Washable aluminum air filter, 8 1/4 x 8 1/4 x 1/2.
- External low voltage connections for remote installation of dehumidistat, high speed switch or timer.
- Duct connections are 5".
- Four reinforced rubber straps are provided for suspending unit from joists.

Installation:

Typically, the Superchanger is located in an area that will allow for easy access to facilitate ductwork connections and to allow for access to impeller and air filter for cleaning. May be mounted in attic areas and basements. No condensate drain is required.
